HOW DOES AI TALK TO RVI ?

RVI

In this example, we have a simulation of a courthouse allowing public users, attorneys and real estate people to search for documents using AI.

When you click on the RVI Assistant tied to the Rapides Parish Clerks office you get this prompt.

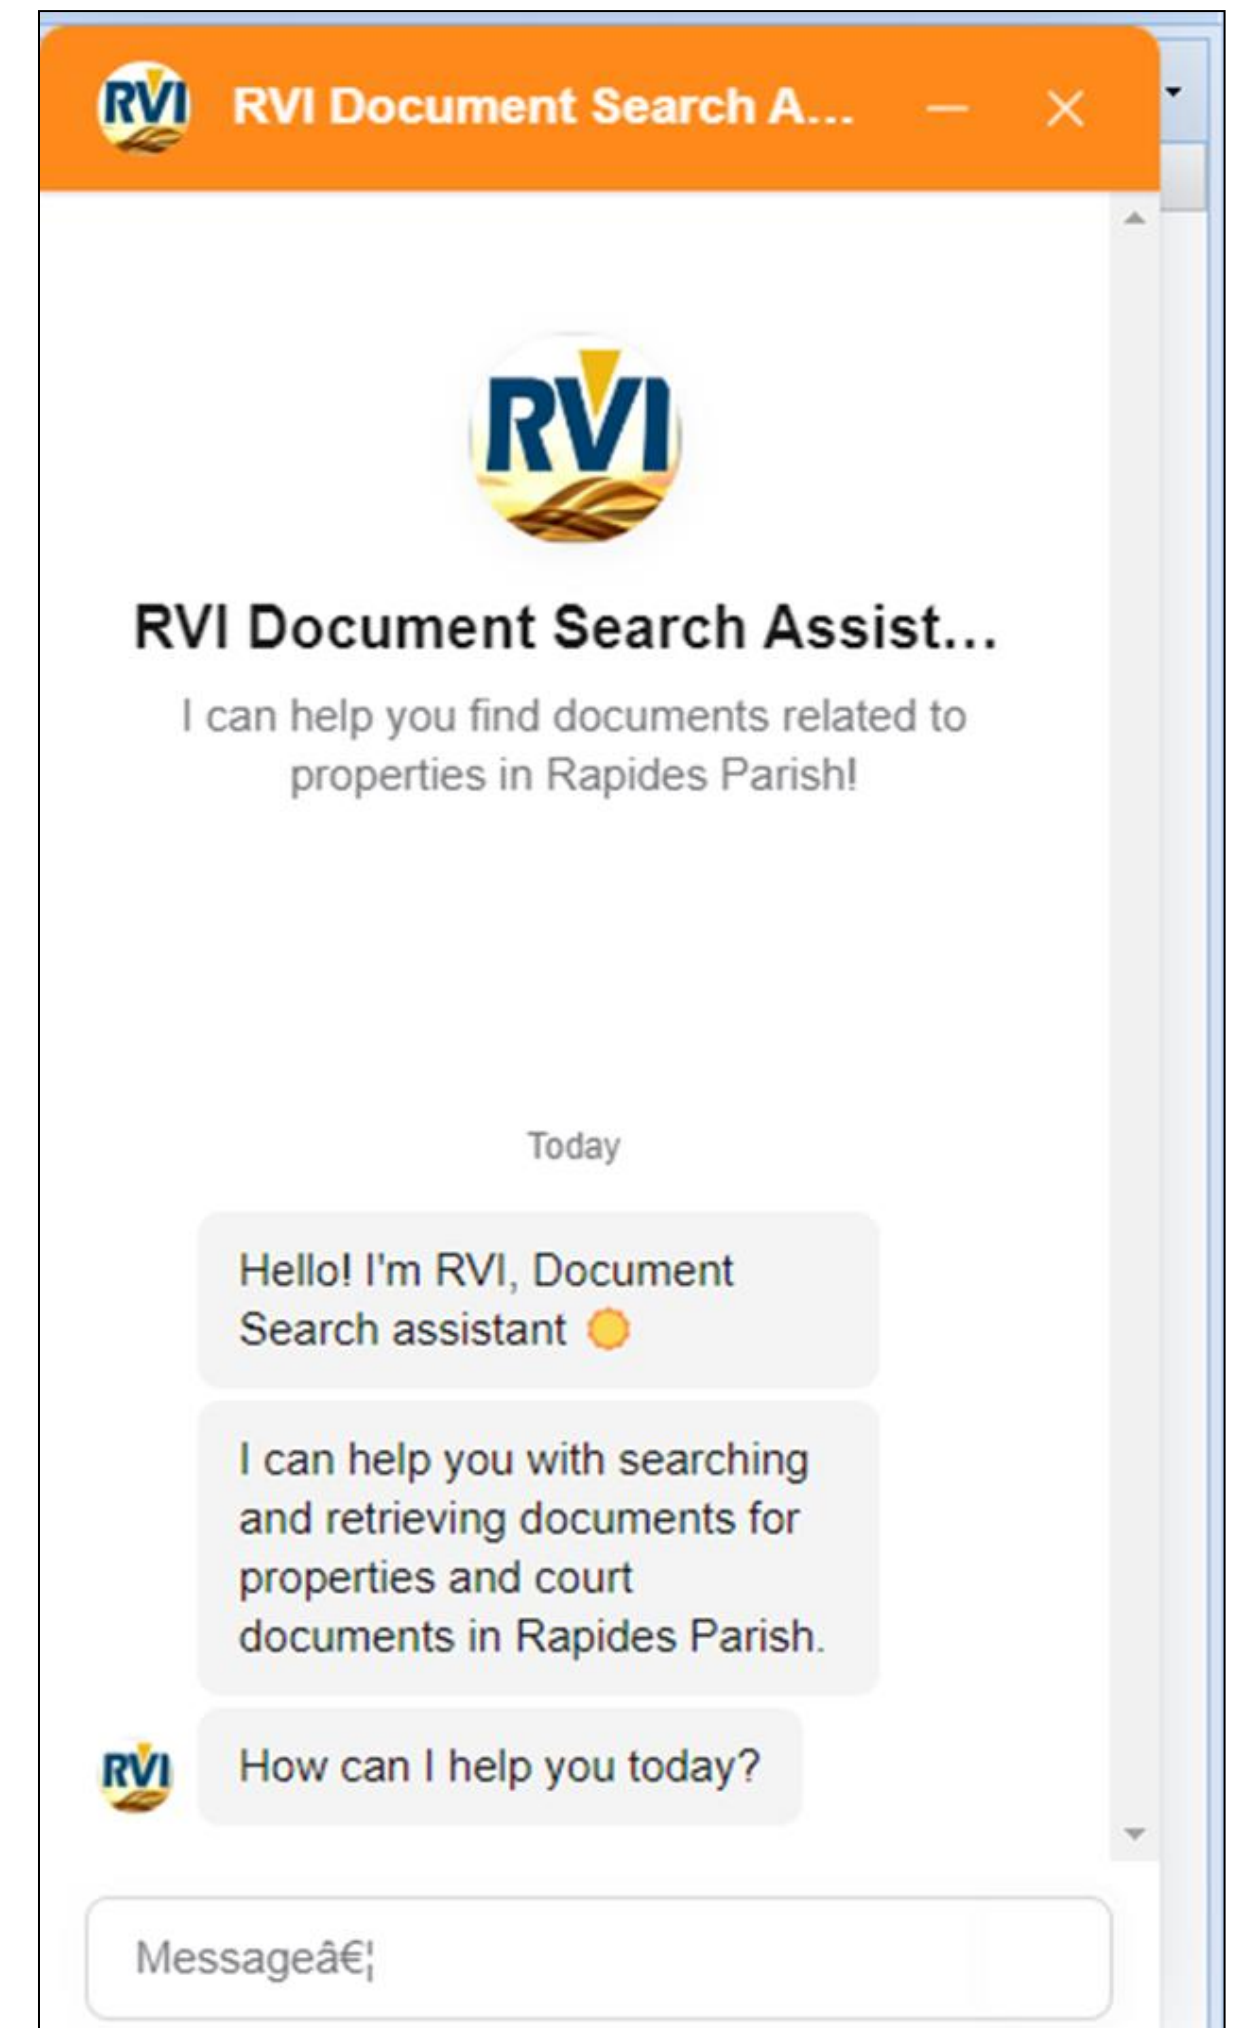

DOCUMENT SEARCH

The prompt is saying you can search for court document and property documents.

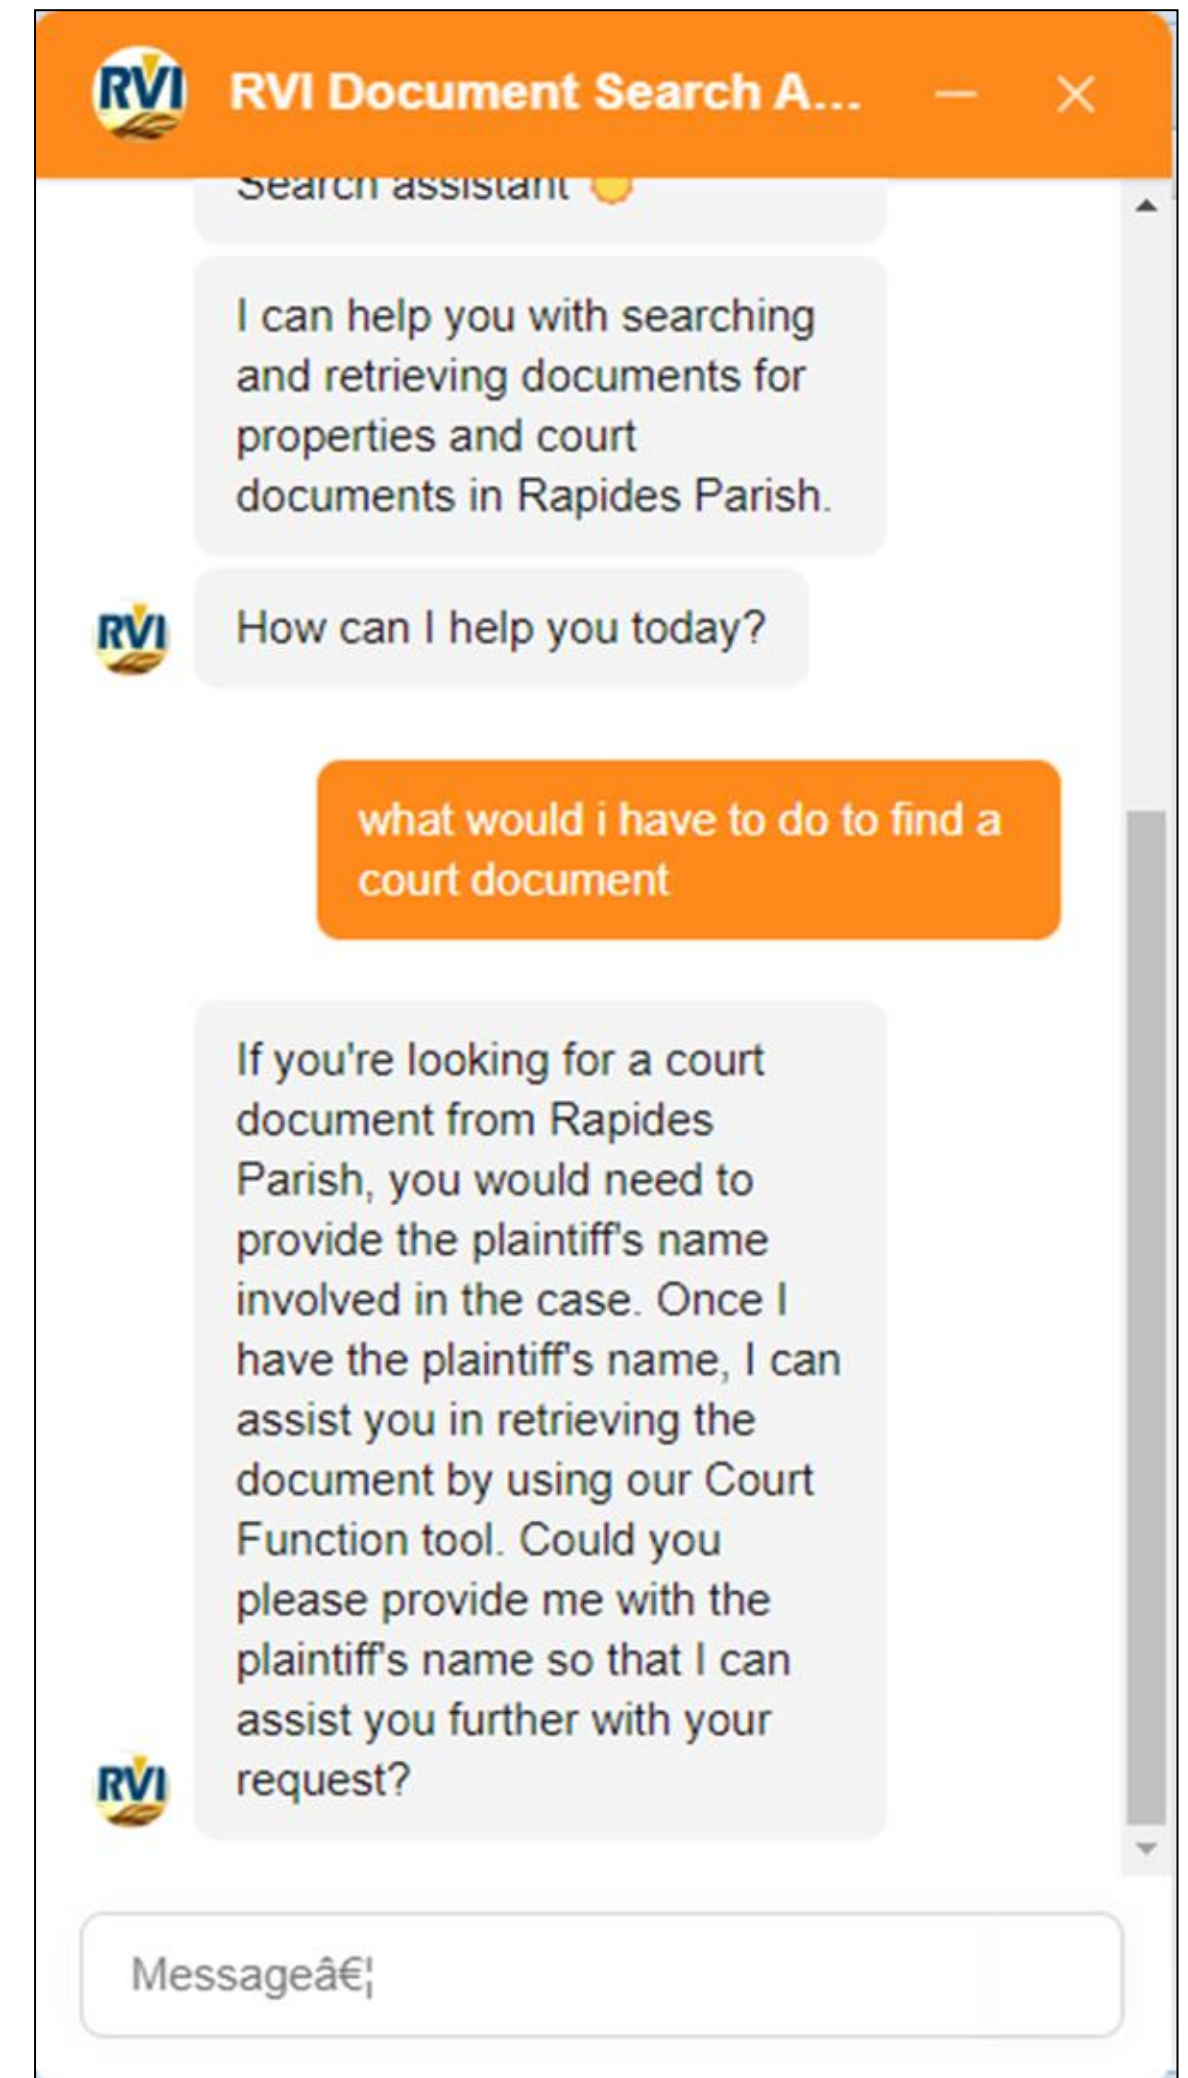

ASK A QUESTION

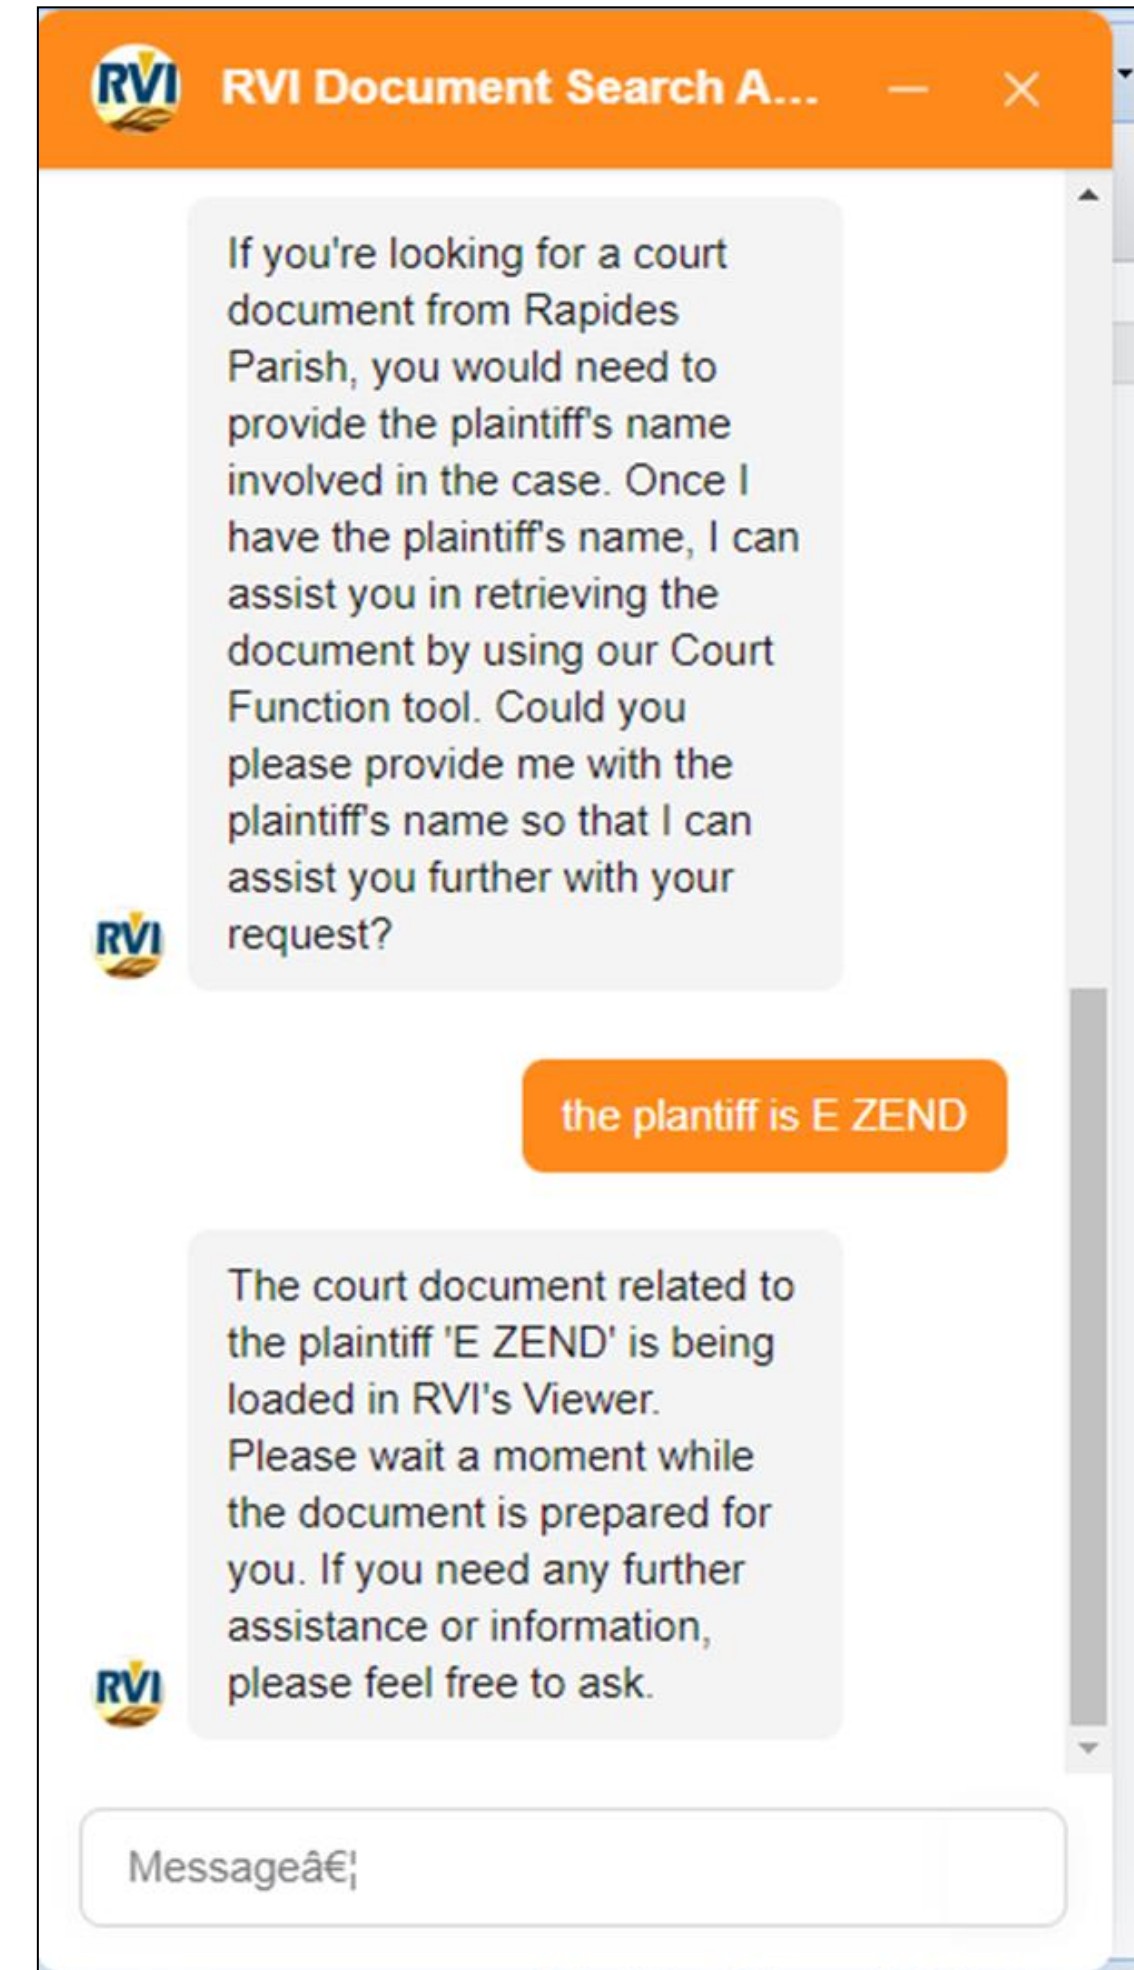

DOCUMENT SEARCH

In this case you would need to put in the plaintiff's name to see a list of filed documents through RVI.

DOCUMENT SEARCH

I gave it the name **E ZEND** and the AI talked to the RVI Agent at Rapides Parish and returned both documents for this plaintiff.

DOCUMENT SEARCH

To view the document - double click on the list.

One Look Lite

Page 1 of 1 | Displaying 1 - 2 of 2

CASE NO	FILE DATE	PLAINTIFF	DEFENDANT	CASE TYPE	COURT/JUDGE	DOCUMENT TYPE
241780	03/15/2017	E ZEND	H POTTER	C	MONTGUE	FIRST SUPPLEM
241780	04/22/2017	E ZEND	H POTTER	C	MONTGUE	PETITION

RVI RVI Document Search A...

If you're looking for a court document from Rapides Parish, you would need to provide the plaintiff's name involved in the case. Once I have the plaintiff's name, I can assist you in retrieving the document by using our Court Function tool. Could you please provide me with the plaintiff's name so that I can assist you further with your request?

the plaintiff is E ZEND

The court document related to the plaintiff 'E ZEND' is being loaded in RVI's Viewer. Please wait a moment while the document is prepared for you. If you need any further assistance or information, please feel free to ask.

DOCUMENT SEARCH

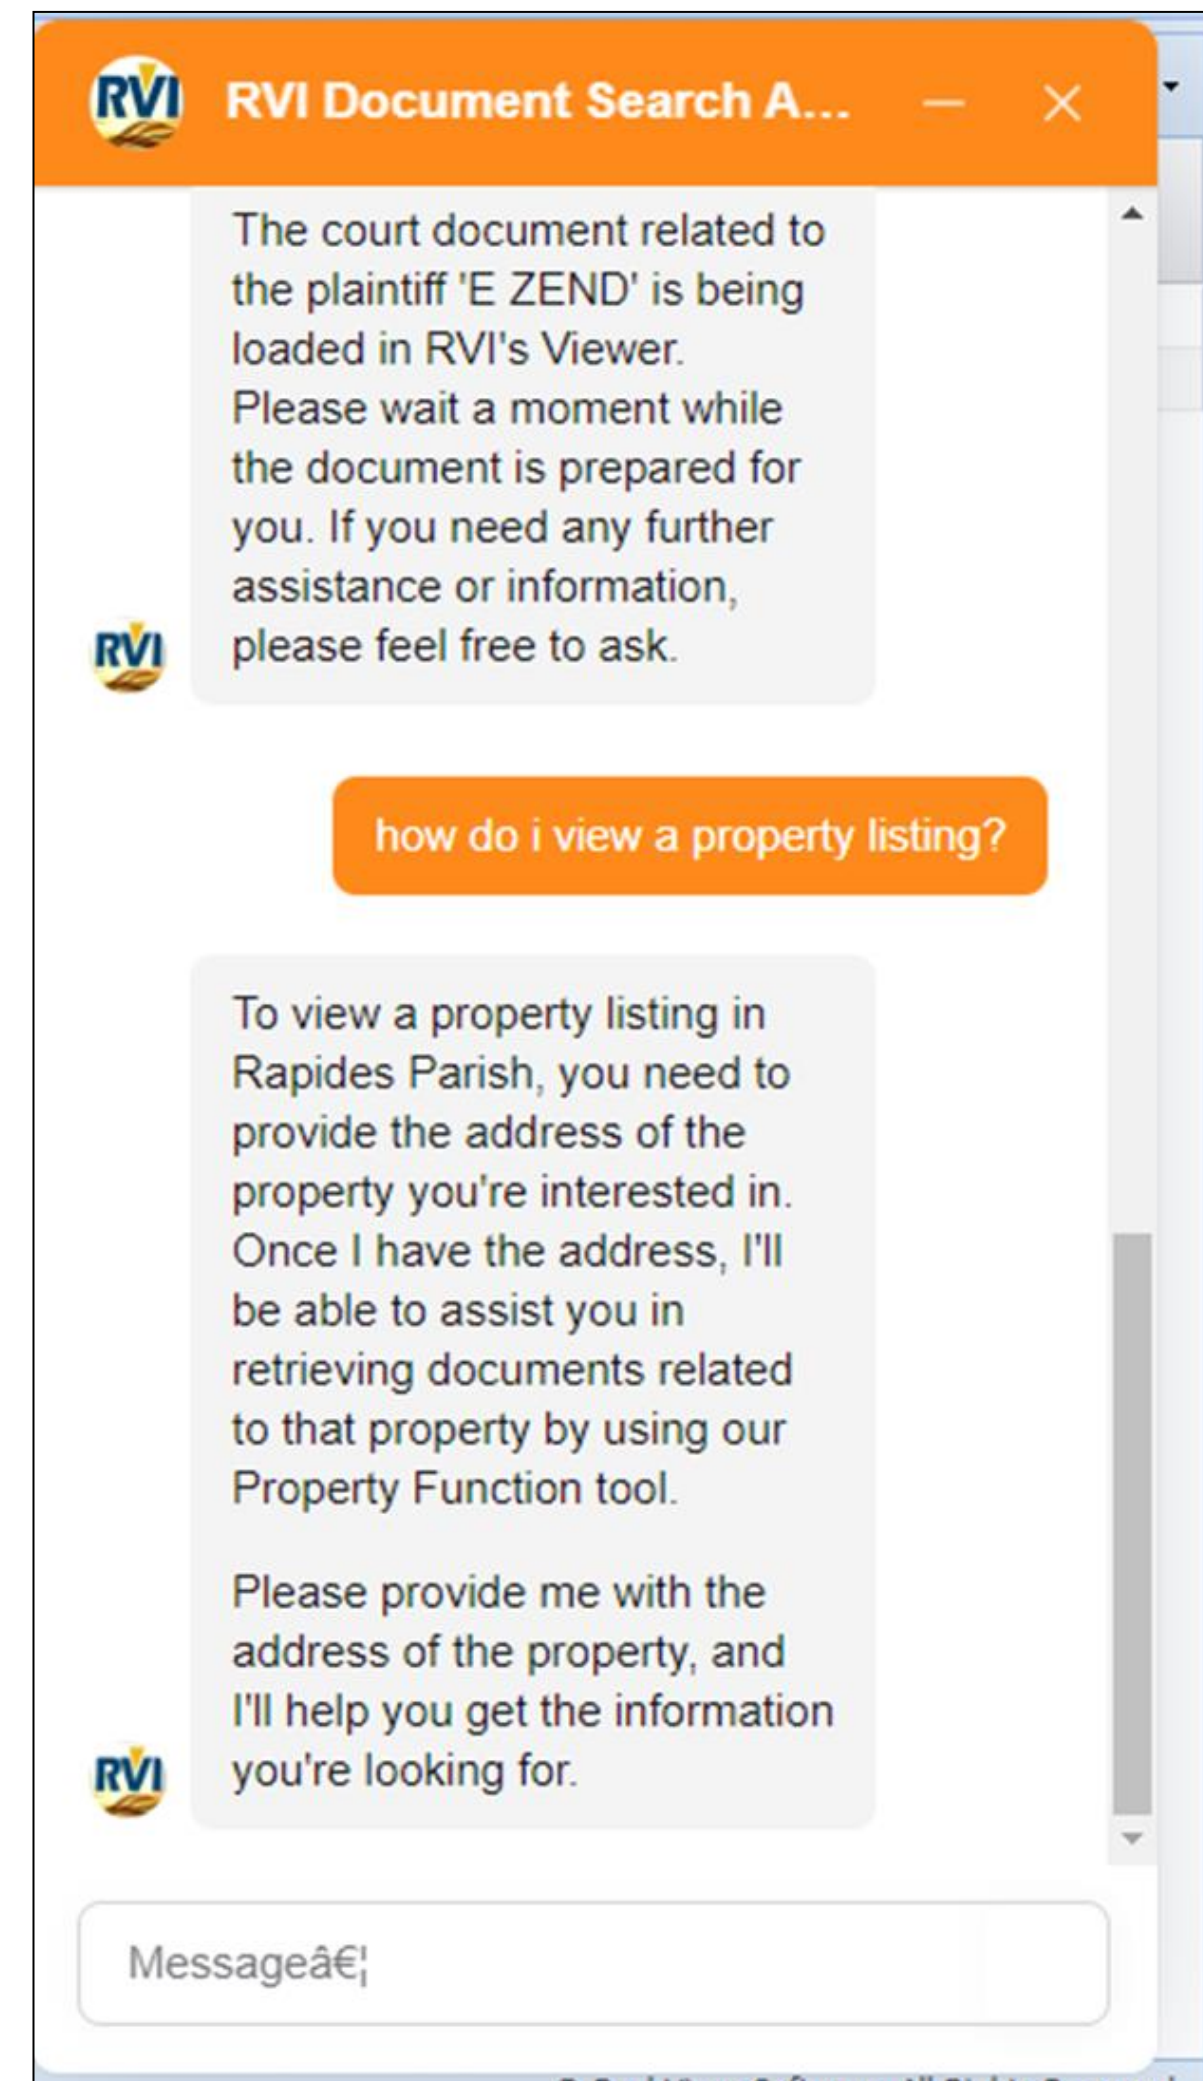

The assistant said I could also view documents on file for property listings

You Must Ask AI That Question

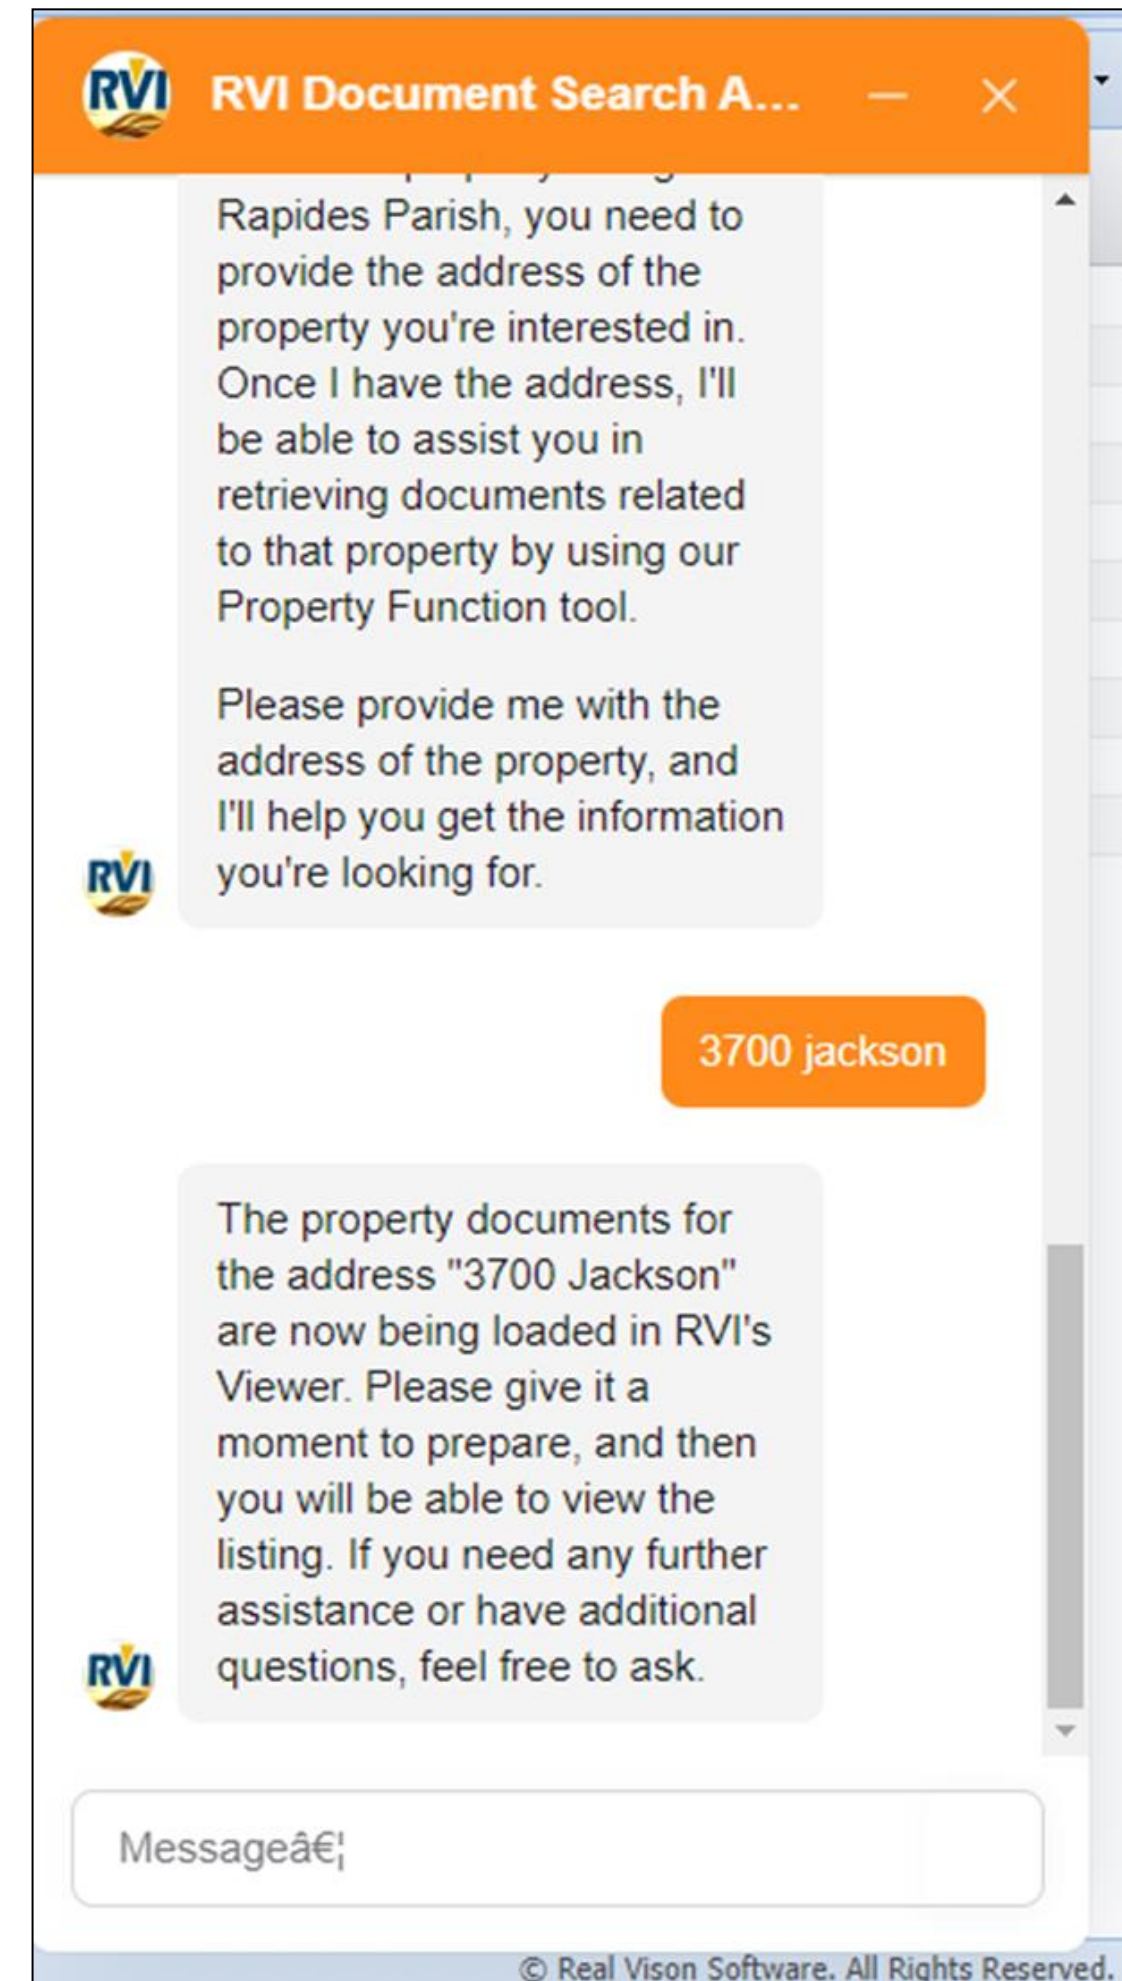

it says to provide the address

The Results Are In

it says it found some tax documents for this property

REAL VISION IMAGING

Capture Documents / Automate Workflows

Real Vision Imaging (RVI) for IBM and Windows:

RVI software is equipped with nearly everything needed to digitize documents and automate workflows. Secured access to documents is now just one click away from the office, over the web or even from a mobile device. The RVI capture system supports scanned paper, imported PC files (word processing, spreadsheets, emails, audio-visual data, and more) and even your IBM i spool file/report output.

RVI is available as a native application for both IBM i and Windows servers (or as a hosted cloud solution). OneLook is the user interface common across all three RVI systems which simplifies possible server changes. Its intuitive look and feel makes it easy for the users to learn and there is no code to download since it is browser-based.

The base product includes a capture system, an advanced workflow and approval system, mobile apps, integration tools, security and retention controls, and detailed audits with customized dashboards. With RVI, you pay just ONE price just ONE time. There are no user-based charges, no scanning fees, and no optional modules to purchase. The annual support is just 16.5% which includes future releases.

RVI can be installed as a stand-alone system or integrated

Here's what you get with RVI systems:

Server Platform	IBM i	Windows
Database	IBM DB2	Microsoft SQL
User Interface	RVI OneLook	RVI OneLook
Capture System	Included	Included
- Scanned Paper	Yes	Yes
- Imported PC Files	Yes	Yes
- Print Output	Yes	Yes
- Inbound Emails	Yes	Yes
- Signature Capture	Yes	Yes
Workflow/Approvals	Included	Included
Integration Tools	Yes	Yes
Web Enabled	Yes	Yes
Mobile Apps	No Charge	No Charge
Security Controls	Yes	Yes
